## OCTOBER 2023 NEWSLETTER

### JAYNE'S JOTTINGS

Well, after unprecedented weather conditions, I hope this Newsletter finds you all safe and well! I hope that your fuchsias are all tucked away and not floating away into the River Erewash, the Trent or the Derwent!

I am close to finishing overwintering my mum's fuchsias, so hopefully I will then be able to crack on and sort mine out before we start getting any severe frosts. At least I still have some colour in the garden!

## POEM OF THE MONTH

### **LEAVES** *by Elsie N Brady*

How silently they tumble down  
And come to rest upon the ground  
To lay a carpet, rich and rare,  
Beneath the trees without a care,  
Content to sleep, their work well done,  
Colours gleaming in the sun.

At other times, they wildly fly  
Until they nearly reach the sky.  
Twisting, turning through the air  
Till all the trees stand stark and bare,  
Exhausted, drop to earth below  
To wait, like children, for the snow.

## 28<sup>th</sup> NOVEMBER - AGM

Please note that next month is our AGM. It also means that it is our Christmas Buffet. I have a list (as usual) which I shall hand round, if you wouldn't mind jotting down what you intend to bring along I'd very much appreciate it. I have an indication then whether we have too much savoury or too many desserts.

# GROWING FUCHSIAS

Taken from one of our own past Newsletters (October 1995): -

## OVER-WINTERING FUCHSIAS

1. Plants can be buried in the garden at a depth where frost cannot reach them, say 18 inches to 2 feet. Remove all the leaves and prune lightly. Mark the spot where they are buried.
2. Plants can be stored in a dormant state in any frost free area, but I would suggest that the temperature does not exceed 40°F as they may decide to start into growth. Remove all leaves and prune lightly, check occasionally and water lightly if dry. Do not allow the compost to become wet as this can cause the roots to rot. In the spring start the plant into growth by putting it into a light, warmer area (40°F is sufficient) and do not increase the watering until there is leaf growth to remove it from the compost.
3. If you can maintain a temperature of 40°F you can over-winter plants in a greenhouse/Conservatory. Remove all the leaves and prune lightly, they will remain in very slow growth until the light level increases in the spring, again do not over-water.
